WORK EXPERIENCE

Software Engineer

Evolve IP

Rotterdam, NL

05/2020 – present

Development and DevOps for VoIP, call center, CRM, and cloud-based software integrations, including:

- RESTful Back-end web services using REST, C# and .NET Core.
- gadgets integrating call centers/ cloud CRM's with back-end web services using JavaScript / TypeScript, Angular, HTML and CSS.
- call center analytics and reports using SQL and XML.
- automated SQL-based solution gathering data from a handful of VoIP platforms for billing service.

Software Engineer Mobile

Information Makers

Alblasserdam, NL

09/2019 – 02/2020

Developed a mobile application with Xamarin, C# and .NET.

Analyzed the existing Java Android application and converted all backend functionality to multiplatform Xamarin. Analyzed, selected, and implemented the architecture and structure of the application and modern design patterns such as Dependency Injection and AsyncAwait.

EDUCATION

Bachelor of Computer Science

Minor in Full-stack Java Development

Hogeschool Rotterdam

Rotterdam, NL

09/2017 – present

Minor:

developed a web shop with RESTful three-layered JVM and Spring back-end, TypeScript and Angular front-end.

Other projects:

- AR and AI project with Python, OpenCV, pathfinding and Android.
- Web shop using C# and .NET Core backend, Azure cloud database, TypeScript front-end.
- Android mobile application for scheduling sports.
